Thomas Brown – BP Castrol Logistics Manager

Travis Freyer – BP Castrol Transport Manager

Andhika Chandra – BP Castrol Transport & Operations Specialist

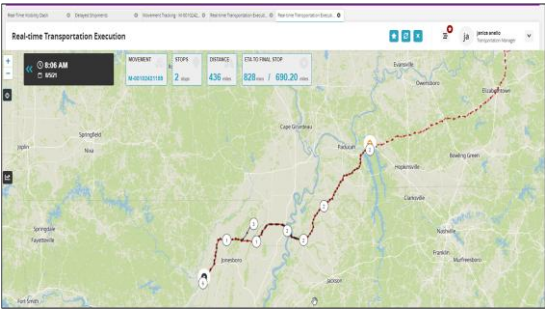

Jeff Portwain – One Network Project Director

Isabel Wong – One Network APAC Onboarding Specialist

BP CASTROL - EXECUTIVE SUMMARY

The Reason for Change?

- Safety, efficiency, reliability, accuracy of movement of goods, and cost control are paramount. With the complexity of transporting critical materials—often in remote locations and under tight deadlines—carriers face unique challenges that require innovative solutions. This joint initiative to implement a cutting-edge, digital Transportation Management System (TMS) is the key to overcoming these obstacles and ensuring a smoother end-to-end supply chain.
- Together, we'll improve operational efficiencies, and ensure better service to our business stakeholders, all while keeping safety and compliance at the forefront.

Receive Notifications & View Movements

- Drivers can view & select shipments
- Drivers can validate items through ONE Mobile App
- Digital capabilities

Upload Tracking Event

- Drivers can upload Shipment documentation, Labels, POD and Attachment through ONE Mobile App

Dashboard Analytics & Reporting

- Transport management and load efficiency

BP CASTROL & ONE: DIGITAL SUPPLY CHAIN NETWORK

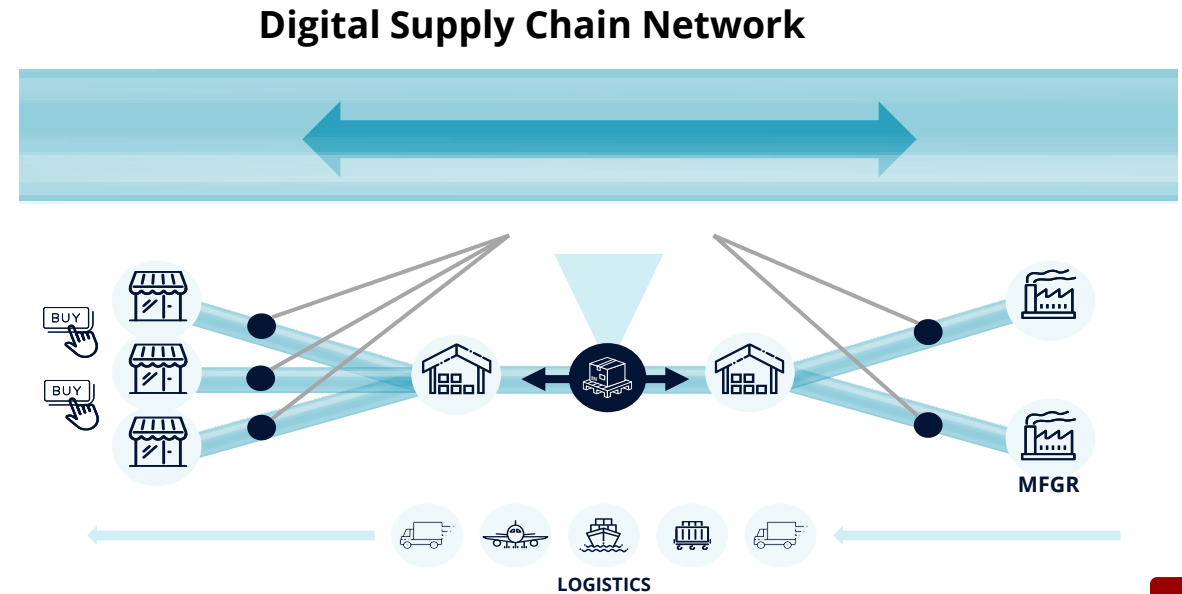

Internally and Externally Siloed:

- Need for a Castrol harmonized system
- Need for real-time visibility on lead time
- Manual data entries and reporting
- Increase order visibility
- Improve delivery flexibility

Glass Pipeline:

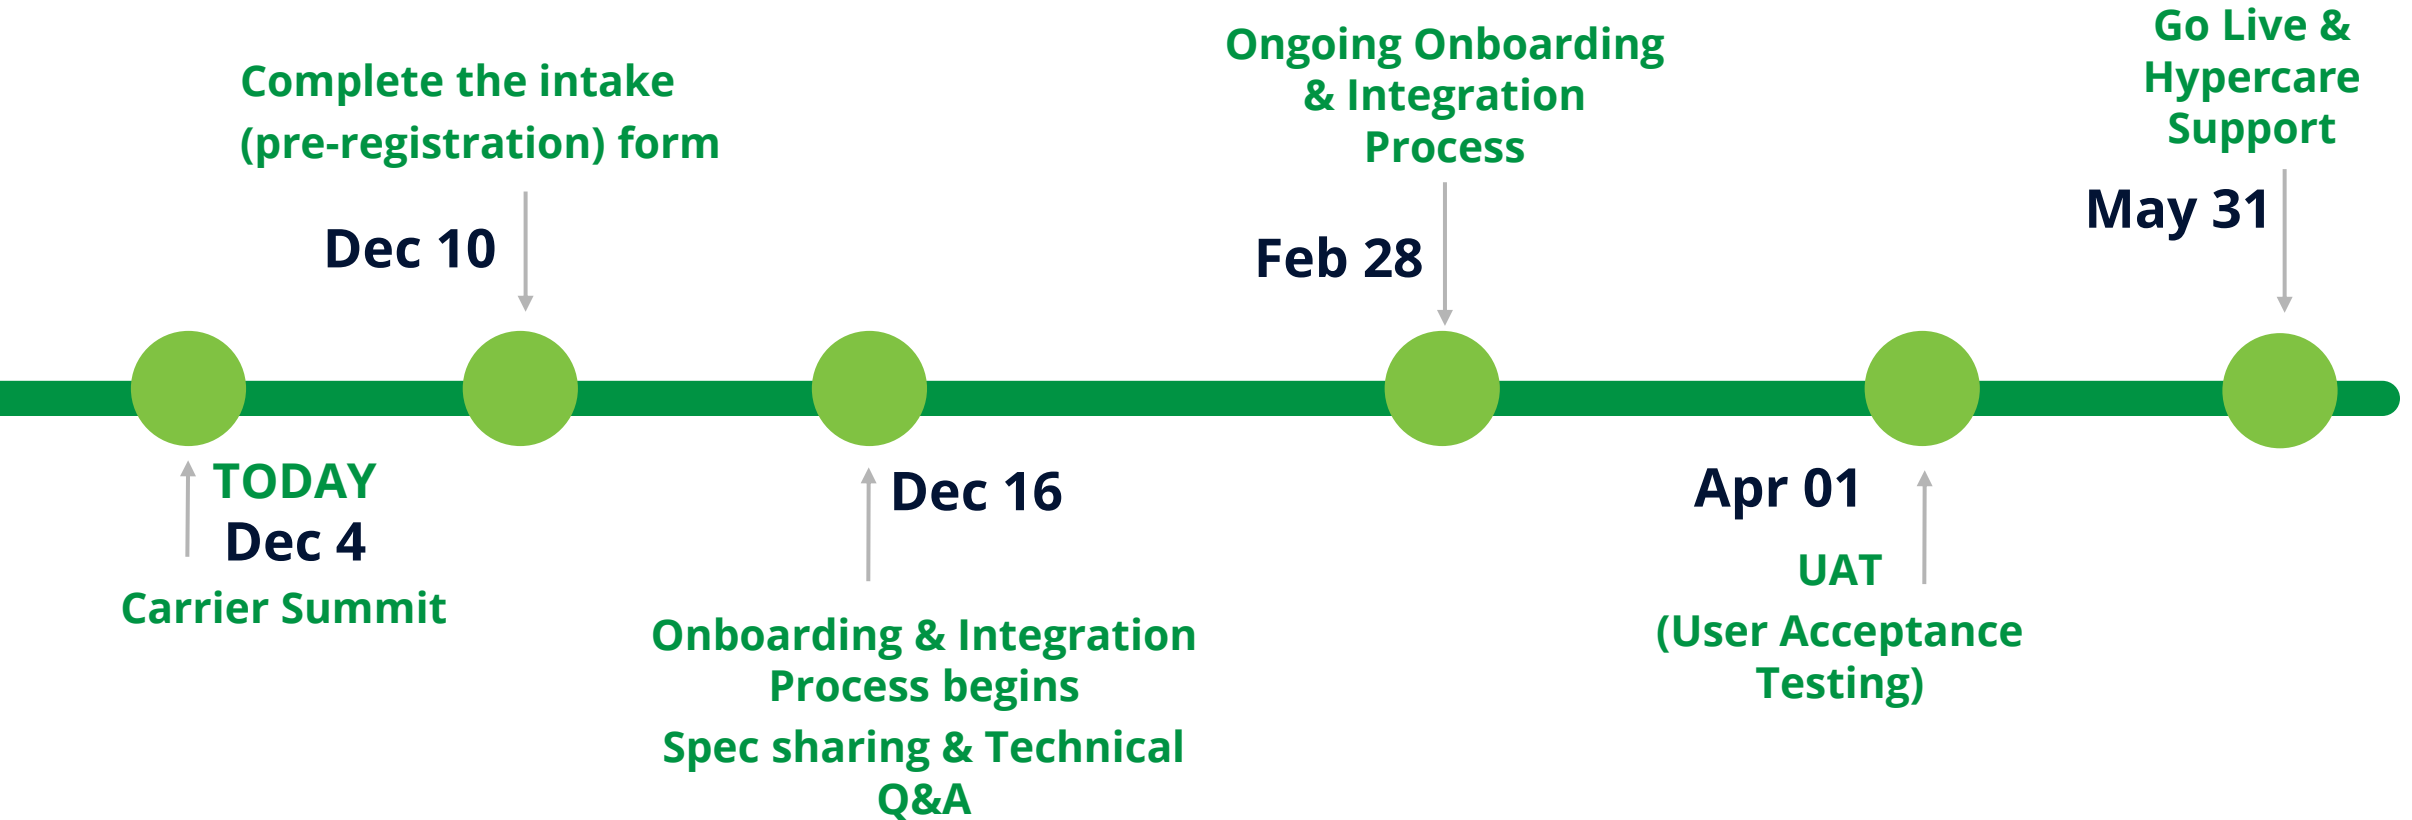

- Single Version Of Truth for all partners
- Real time data driving processes and collaboration
- Visibility into real-time tracking
- Visibility of all scheduling and consignment
- Real-time location tracking

IN SCOPE

- All Castrol lubricant products – pack, bulk and grease
- Regional and metropolitan in Australia and New Zealand
- Warehouse to warehouse
- Warehouse to customer
- 10 integrated / rest on One Network User Interface

TIMELINE

WHAT IS CHANGING FOR BP CASTROL CARRIERS

- **Shipment Communication Process**

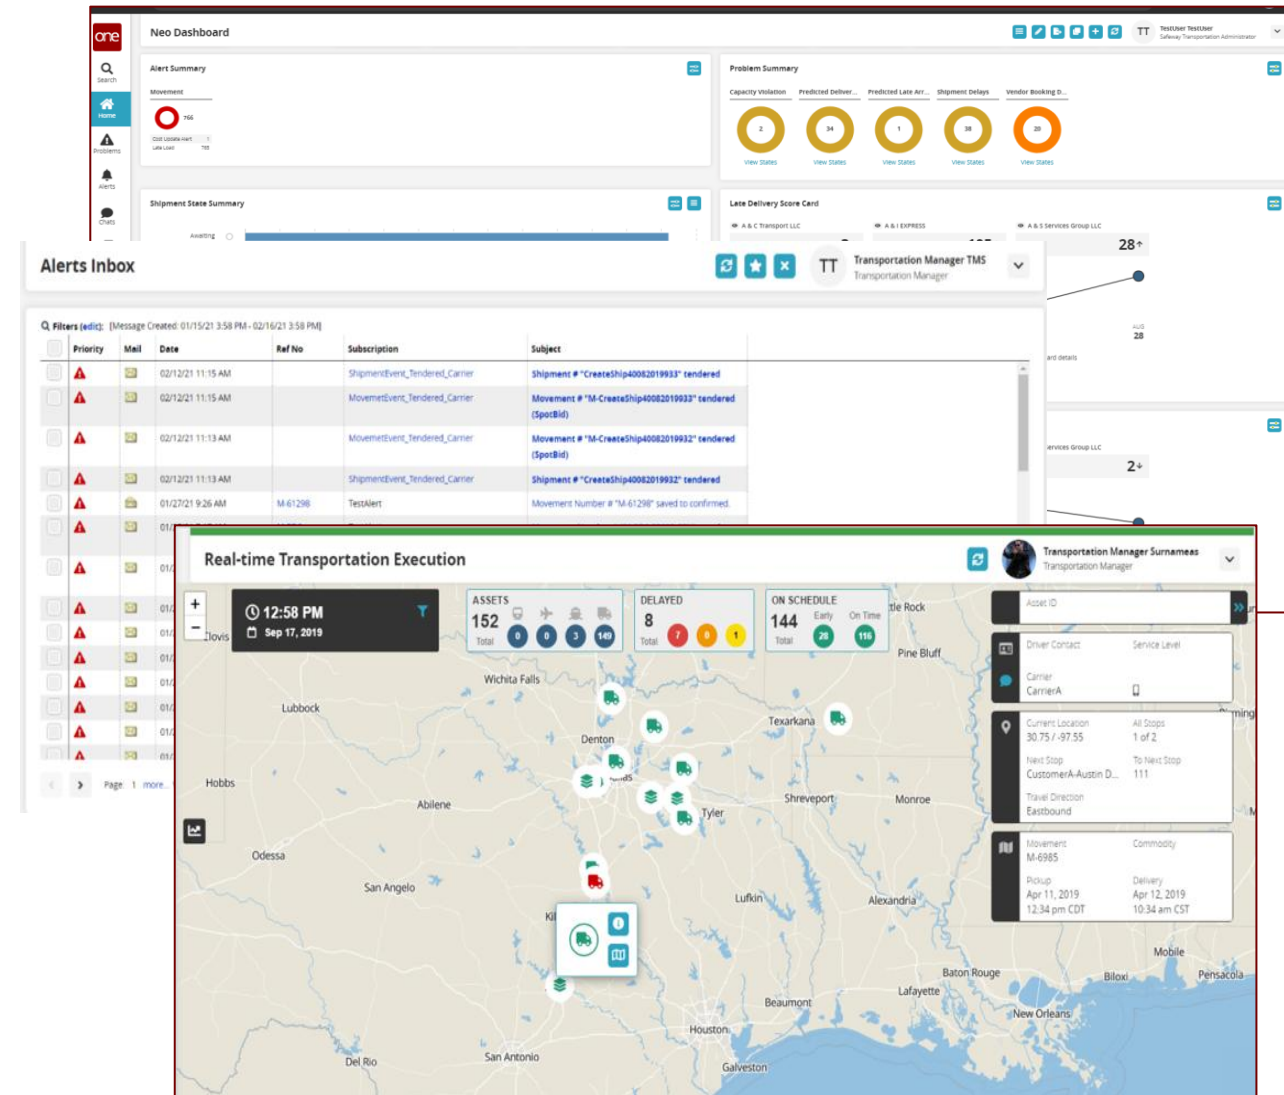

- Confirmation of the Appointment
- Dispatch batching file / Order file

- **Transport Execution**

- Carriers can follow suggestions to build Movements or fulfill their own plan and submit completed movements to the assigned truck/driver
- Driver will be able to receive notifications via the mobile app and provide updates or upload documents during the run

- **Reporting and Analytics**

- Enhanced view of Shipment status
- Measure on-time, in-full performance
- Enable automated alerting services on orders, forecasts, shipments and problems that require action.

CARRIER BENEFITS – *Reduced lead-times and variability*

Enhanced Shipment Visibility and Control

- Access to a centralized platform offering real-time shipment tracking, route optimization and status updates
- Improves decision making, fewer delays, and stronger communication with shippers

Comprehensive Analytics and Reporting

- Powerful reporting capabilities enables data-driven insights into transportation performance
- Supports continuous improvement
- Enhances decision-making

Freight Invoicing and Financial Reconciliation

- Access to freight cost computation and invoice generation
- Resources are freed to focus on what matters most instead of manual time-consuming tasks
- Streamlines financial reconciliation and ensures accuracy in billing

Welcome to the BP Castrol Carrier Portal

BP Castrol (BP) invites you to join us on One Network Enterprises, a Blue Yonder Company's Digital Transportation Management System (TMS) to

Unlock Efficiency and Drive Innovation.

What is this Initiative About?

BP Castrol is committed to transforming the way freight is managed across the entire supply chain, and has been planning this behind the scene for years. In this partnership with One Network, we enable carriers to leverage our state-of-the-art technology that streamlines day-to-day operations, automates key processes, and provides real-time visibility into shipments and performance.

By joining this initiative, you will be at the forefront of a collaborative, technology-driven ecosystem that unlocks new growth opportunities, reduce inefficiencies, enhance visibility, improve delivery accuracy, lower operational costs, and ultimately boost your bottom line, while enhancing customer satisfaction.
